

Table ronde: *open access*: le point de vue de l'éditeur

Prof. S. Louryan

Membre de l'Académie Royale de Médecine de Belgique

Laboratoire d'Anatomie, Biomécanique et Organogenèse

ULB Faculté de Médecine

Rédacteur en chef honoraire du *Bulletin du GIRSO*, de *Radiologie-J CEPUR (Sauramps)* et de la *Revue Médicale de Bruxelles*

Rédacteur en chef adjoint de *Morphologie (Elsevier)*

Editeur des *Annales du CEPUR (Sauramps)*

Le libre accès: pourquoi?

- Problème du double coût
- Moyens financiers dans les pays en voie de développement
- Budgets...

Deux modalités:

- Doré
- Vert (institutionnel ou associations)

L'édition, même électronique, a un coût

- Sur qui le répercuter?
- Partage des coûts?

Les éditeurs prédateurs !!!!!

Predatory Blogger Academic Lament Jeffrey Beall

Beall Doubles down... Predatory blog shut down
 Jeffrey Beall will be criminally prosecuted in USA for fraud, extortion, bribery and money laundering

Predatory blogger Beall created over his criteria and directed all of false claims, causing tremendous injury, personal and professional, to countless numbers of individuals, publishers and organizations. He should be made to release the full content of every blog post he ever published, because that information was in the public domain. So, by sneakily removing all information, he has not only acted cowardly, but irresponsibly.

Google search keywords: Predatory Blogger

Beall is not a recognized authority in evaluating scholarly Journals
 Man with no credibility

Jeffrey Beall - Potential, possible, or probable predatory blogger

Jeffrey Beall's blog has no affiliation to any governing body or organization accredited to scholarly publishing. This is an important key element that needs to be considered when analyzing his blog. He is just a single individual writing a blog (full of nonsense) same as many others do over the internet. His blog is his personal opinion and has not been needed for its validity and as such has no authority whatsoever. Even so, Beall attempted to create a problem that does not exist. When we compare the number of open access journals around the world, Beall's list is not significant at all. Despite that, Beall has maliciously decried many Open access journals and demanded reasons in exchange for the removal of them from his list. This academic crime must end. We have added Jeffrey Beall to our list as a potential, possible, probable, predatory Blogger. [Read more](#)

Jeffrey Beall - Academic Lament

Be aware Jeffrey Beall - Academic Lament
 Jeffrey Beall just simply confuses us to promote his academic lament. He is fully operational, the surveying method is not scientific. If he is a real scientist, then he must do everything in standard way without any disguise. Beall utilizes his bribery and unethical business model. If we support Jeffrey Beall's work, then we are also a part of his criminal activity. Please avoid Jeffrey Beall's unethical and criminal activity.

Predatory Blogger, Beall's Facts Checker

Beall claims to be a professor at the University of Colorado, but he is not. He is only a library student worker. His actual given academic rank is library employee. Theoretically, a student worker at the University of Colorado could be a professor and actually this is what happened with Beall. He is a graduate student with a bachelor degree in Spanish. He says he is a professor at the University of Colorado but that is also not true. We should not refer to him as Professor Beall or Dr. Beall because it is not true. Most importantly, he has no Ph.D in any discipline.

Jeffrey Beall - Alcoholic and drug addict Drunken Shupper

Drunken Shupper Jeffrey Beall - Alcoholic and drug addict
 Beall utilizes his blog to solicit open access journal publishers to fund his drug habits. Beall will know getting into circles as a heavy weed (Marijuana) smoker and alcoholic.
 Be aware, Beall's criminal activities.

Site presque homonyme où Jeffrey Beall est qualifié d'alcoolique et de toxicomane, et où on insinue qu'il demande 3000 \$ pour retirer un journal de sa liste.

LIST OF PUBLISHERS

Beall's List:

Potential, possible, or probable predatory scholarly open-access publishers

This is a list of questionable, scholarly open-access publishers. We recommend that scholars read the available reviews, assessments and descriptions provided here, and then decide for themselves whether they want to submit articles, serve as editors or on editorial boards. In a few cases, non-open access publishers whose practices match those of predatory publishers have been added to the list as well. The criteria for determining predatory publishers are [here](#).

We hope that tenure and promotion committees can also decide for themselves how importantly or not to rate articles published in these journals in the context of their own institutional standards and/or geocultural locus. We emphasize that journal publishers and journals change in their business and editorial practices over time. This list is kept up-to-date to the best extent possible but may not reflect sudden, unreported, or unknown enhancements.

LIST OF STANDALONE JOURNALS

Potential, possible, or probable predatory scholarly open-access journals

This is a list of questionable, scholarly open-access standalone journals. For journals published by a publisher, please look for the publisher on the list of publishers, [here](#). This list is only for single, standalone journals.

We recommend that scholars read the available reviews, assessments and descriptions provided here, and then decide for themselves whether they want to submit articles, serve as editors or on editorial boards. In a few cases, non-open access journals whose practices match those of predatory journals have been added to the list. The criteria for determining predatory journals are [here](#).

We hope that tenure and promotion committees can also decide for themselves how importantly or not to rate articles published in these journals in the context of their own institutional standards and/or geo-cultural locus. We emphasize that journals change in their business and editorial practices over time. This list is kept up-to-date to the best extent possible but may not reflect sudden, unreported, or unknown enhancements
